george.savchenko@gmail.com

SKILLS

Technologies: TypeScript, JavaScript, React-Native, NativeScript, React.js, Angular, Redux, NgRx, RxJs, Three.js

EDUCATION

Bachelor of Computing   2017 – 2018

University of Guelph

Advance Diploma of Software Engineering Technology   2013 – 2016

Centennial College

EXPERIENCE

Frontend Developer   Sept 2020 – present

CybernetIQ | Ottawa, Ontario

- Leading development by introducing and implementing reactive programming principles
- Rebuilding frontend in React and Three.js using functional programming patterns
- Doing total migration of frontend from object to data driven architecture using Redux and Redux-Observables
- Creating clean, reusable, self-contained, components using styled components
- Introducing new unit tests using jest and enzyme for every module migrated from previous application
- Establishing new code review process and style guides to increase code consistency and quality

Software Developer   Jan 2019 – Aug 2020

Vish ltd. | Montreal, Quebec

- Accelerated rebuild and tech stack upgrade of main tablet NativeScript Angular application
- Worked with functional programming patterns to completely overhaul UI and UX based on user needs
- Unit and end-to-end tested components leveraging Jasmine, TypeScript Mockito and NativeScript Appium
- Contributed to other applications in the suite using Angular, RxJs, NgRx, Ramda, PostCSS and more

Software Developer   Nov 2016 – Aug 2017

WIMTACH | Scarborough, Ontario

Cross Platform Access Control App
- Developed Android and iOS access control app using React-Native
- Added user login, Bluetooth Low Energy connecting and microcontroller communication for access control

3D Graphics Module for Website Front End

- Created graphics module for managing 3D models using Three.js and TypeScript for building mechanical arms
- Implemented a system for combining parts, adding/removing, saving/loading custom combinations of parts

3D Simulator Synced with Wearable Device

- Developed Windows and Android walking simulator application using the Unity Engine
- Achieved wearable device communication to synchronize avatar steps with user
- Implemented Bluetooth packet management
